

# Protect your profits and the environment

Reduce your CO<sup>2</sup> emissions with

**MULTISAVE**

a new initiative from

**ANTIFRICTION  
COMPONENTS LTD**

# Preserving your energy consumption, your assets and your ongoing production!

We're all looking to minimise downtime and environmental impact whilst maximising profits and efficiency - in a nutshell we want to use less to do more. But with so many solutions and products to choose from, how do you know which will be best for your business and the environment?

The advantages of using energy efficient light bulbs or recycling office materials can pale into insignificance against the cost of running inefficient fans, pumps, conveyors, compressors or poorly installed, selected or maintained drive systems. So, if you're a large consumer of

electricity with bills that run into thousands per month MULTISAVE from Antifriction Components can calculate the best combination of solutions and the potential savings you could make. Take a look at just some of the latest products available, that we recommend and support on-site.

## ABB Small Drives

ABB have the most innovative range of small drives in the market place and have vast experience of saving customers huge amounts of money by increasing energy efficiency using their 6 point energy saving plan. As ABB Partners, Antifriction will help your business to take advantage of the potential cost savings. **Do you have speed controls on your existing motors?**

## SKF Energy Efficient Bearings

SKF, the world's leading bearing manufacturer have developed an enhanced bearing design that increases energy efficiency. **As a bearing is at the heart of every moving part, could this have significant benefits to your business?**

## Camozzi Fluid Power

If you have compressors creating compressed air for leaky pneumatic systems you can literally be blowing money away. Let us work with Camozzi and ensure your air flows are properly specified, maintained and regulated. **When did you last check your pneumatics?**

## Tsubaki Lambda Chain

Improper chain lubrication can result in huge energy implications. The world's most advanced lube-free chain from Tsubaki can help increase machine reliability as well as substantially reducing greenhouse emissions and production downtime. **Do you insist on lube-free chains?**

## Nord Drive Systems

Poor gearbox selection can ruin the efficiency of many drive systems. As a master distributor for Nord UK, our customers now have access to the latest technology and expert advice locally though our branch network. **Are you stressing the need for efficient gearboxes?**

## Molykote Lubricants

To increase reliability, lower emissions and reduce costs, proper lubrication is more important than ever. Molykote lubricants from Antifriction reduce friction to lower the amount of energy needed to operate equipment - helping the environment and saving you money. **What is your lubrication strategy?**

## Brook Crompton

Electric motor efficiency plays a very important role in the energy efficiency of your plant. Did you know that 95% of industrial motors are oversized? **Are you aware of the differences in running costs between standard and energy efficient motors?**

## SKF Maintenance Products

Product selection, alignment, tensioning, lubrication and monitoring all can play a huge role in energy consumption. We can showcase the latest products with our on-site demonstrations. **Would you like help and advice on-site with monitoring equipment?**

## Optibelt Red Power Belts

Wedge belts, so common throughout British industry, can be inherently inefficient through slippage in the pulleys, poor belt alignment and tension. Antifriction work with Optibelt to advise on these issues and also introduce Optibelt Red Power - a belt that is much more energy efficient than standard wedge belts. **Can you function effectively without Optibelt Red Power?**

# For a greener route to increased profits

Specifically, a MULTISAVE Analysis will:

- IDENTIFY YOUR HIGHEST RISKS
- REDUCE OVERALL OPERATING COSTS
- ENHANCE YOUR ENVIRONMENTAL CREDENTIALS
- REDUCE YOUR CARBON FOOTPRINT

Why not take advantage of our FREE on-site consultation that will detail the potential benefits to your business. Using our MULTISAVE Analysis System, we will work closely with the leading manufactures to survey your plant and make specific recommendations. Where feasible we will express the benefits in pound note savings and payback period in terms of time.

## OUR CORE BUSINESS PRODUCT SECTORS:

- FLUID POWER ● BEARINGS / BEARING REPAIR ● CHAINS, BELT DRIVES AND COUPLINGS**  
**MOTORS ● GEARBOXES ● CONVEYOR OR COMPONENTS ● LINEAR MOTION LUBRICANTS AND ADHESIVES**  
**● OIL SEALS ● TOOLS AND OTHER ENGINEERING PRODUCTS ● CASTORS & WHEELS**
