

A valuable partner for your industry

Antifriction Components is more than just a component supplier. We work in partnership with engineers, stores and buyers to develop solutions that raise overall production efficiency and save money.

Saving Money

We have a full range of the latest products designed to cope with the demanding environment, coupled with the right combination of specialist advice and expert trouble shooting skills that can stop a problem before it happens.

Energy / Environment

As energy costs continue to increase, effective energy management is an urgent priority. From energy efficient motors and the latest generation inverters to improved drive alignment and lubrication Antifriction can help you reduce energy costs.

Quality Products

We have a full range of quality products supported by the world's leading manufacturers, who specialize in the quarry and construction sector. This ensures you get the very latest products and services increasing uptime and driving down costs.

Our rapid response is standard. So is the same-day (or night) delivery, using our own local vehicle fleet ... 24 hours a day ... seven days a week.

For further information, please contact your nearest branch or visit our website.

Antifriction Components is ISO9001 accredited

Some of our partners:

Stopping problems before they start

Quarrying and construction machinery faces some of the toughest operating conditions of any industry. Heavy loads, vibration, misalignment, wide variances in speeds, debris, dust, moisture and extremes in temperature are just some of the issues. Antifriction Components understands the demands placed on the parts used and offers a wide range of products and services for the quarrying and construction industries that will;

- Reduce unplanned downtime
- Reduce maintenance & repair costs
- Increase productivity and profitability
- Increase safety
- Reduce costs

Working with the world's leading manufacturers we offer the latest products and services that have been designed specifically for your industry.

Drives

LASER ALIGNMENT

TSUBAKI LAMBDA

DRIVE CALCULATION

OPTIBELT RED POWER

We offer a full range of top quality products for all drive systems. We also supply alignment tools to ensure maximum efficiency and reduce power consumption. Our drive design support is only a phone call away.

ANTIFRICTION COMPONENTS LTD

Helping to reduce:

Downtime

Missed Deadlines

Inventory Costs

Administration

Emergency Repair Costs

Crushers & Screens

VIBRATORY BEARINGS

MONITORING

LUBRICATION

FITTING & REMOVAL TOOLS

We have a full selection of products suitable to cope with vibration, heavy / shock loads, lubricants designed for the job. A full range of condition monitoring equipment to suit your budget together with fitting tools for speedy assembly and disassembly.

Quality products for harsh environment

PNEUMATIC FILTERS

SPLIT BEARINGS

TORQUE ARMS

INDUSTRIAL MOTORS

Antifriction can provide technical support on a wide range of applications. Supported by some of the world's leading manufacturers, who are constantly working at the leading edge of product design. Developing new products to cope with the harsh / extreme environment.

Conveyor Systems

GEARBOXES

SELF CLEANING DRUMS

TROUGHING SETS

COUPLINGS

Heavy loads, shock loads and contamination can significantly reduce product life, proper selection, lubrication and maintenance can maximize product life and increase uptime. Antifriction Components also incorporates WD Pulleys who specialize in the design and supply of bulk handling conveyor components.
